"I was able to pair PragerU with my education and combat what I was being taught in the classroom. I openly debated my professors using the knowledge PragerU gave me and even changed the minds of some of my left-wing peers."

Ava, college student

A MESSAGE FROM DENNIS PRAGER

This year, I was very fortunate to be the guest speaker at a Passover retreat in South Africa.

Most of those I spoke to were South African and Australian—and I learned that virtually all of their children watch PragerU videos. Once again I was reminded that our message—and our audience—is universal.

I was also reminded the American left is probably the most destructive left in the world today. Just look at our campuses and hospitals. No better case could be made for why PragerU is so important.

Violent protestors hold our campuses hostage—and feckless university administrations allow it. Hospitals now call pregnant women “birthing persons” and advocate cutting the breasts off healthy teenage girls if they say they are really boys.

This level of evil isn’t happening elsewhere. America, I am heartbroken to say, is the greatest exporter of toxic ideas in the Western world today.

Throughout its history, for the good—and now for the bad as well as the good—America has been the most influential country in the world. Therefore, it isn’t hyperbole to state that saving America means saving the world.

If America fails, it’s over.

We must right this ship. And no one is doing more than PragerU in making that possible. PragerU helps millions of people every day become better people, better parents, better leaders, better citizens.

God bless you for making this possible.

“I’m a former liberal who really appreciates the non-dogmatic conservatism of PragerU. I like that it’s rational, intelligent, and brave, and not focused on the news cycle but rather about education in conservative values, for everyone. It’s what’s missing. It’s unique.”

I WANT TO BECOME A BETTER PARENT.

Parenting today is no easy task. Children are being pulled in every direction by forces seeking to undermine traditional values—stripping away the joy and innocence of our youth. "My wife and I recently made our son remove the YouTube app from his phone, as he was spending hours each day mindlessly watching videos that had no positive impact on him (in fact, we believed it was having a detrimental effect). I shared some PragerU videos with him, and then he asked if he could download the PragerU app. I said yes, and since then, we've been having many wonderful, meaningful conversations about all that he's been learning from the PragerU videos! Thank you for the wonderful work you are doing."

"Just a few years ago, I was personally committed to advancing the left's agenda...Today I'm a proud conservative. What changed my mind? I discovered PragerU videos...I started to realize that I had been totally misled by leftist ideas in college. These videos were pivotal to my transformation to conservatism, helping me to become better informed and think more critically about what I really stood for."

God bless PragerU and the entire team that works relentlessly behind the scenes."

WHAT'S ON AMERICA'S MIND?

Ever wonder where your fellow Americans stand on today's controversial issues? Curious about how your opinions compare with other Americans?

The 2024 PragerU quiz can show you where you, your friends, and your family stand in comparison to thousands of other respondents with only a few minutes of your time! Simply scan the QR code, share the link with others, and **answer the 10-question quiz on the PragerU site.**

Scan the QR code to take the full online quiz and see what others are saying.

QUESTION 1

Should the Bible be taught in school?

- A** Absolutely not. Separation of church and state mandates that anything related to the Bible, prayer, or religious practices be kept out of schools.
- B** Children should be exposed to all religions in school, including Buddhism, Islam, and atheism, so they can make their own choices about what they believe.
- C** Religious instruction should be optional and up to individual districts and school boards to determine what is best for their own communities.
- D** Absolutely! America was founded on Judeo-Christian values and teaching the Bible in schools is more important than any other subject.

QUESTION 2

Should America be involved in foreign conflicts?

- A** War is never the answer. We should only use diplomacy to address foreign conflicts.
- B** America should get involved in some wars because it is the best hope for humankind and the only way to prevent the expansion of evil regimes.
- C** America should become involved in foreign conflicts when it is in our own national and economic interest to do so.
- D** The wars America has engaged in have only benefited the military-industrial complex. We should secure our borders and not meddle in foreign affairs.

QUESTION 3

Do you think children should learn about gender identity and LGBTQIA+ issues in school?

- A** Schools should encourage children to question their gender identity and provide a safe haven from parents who may disagree with radical gender ideology.
- B** Children need to be exposed to ideas about gender, sexuality, and identity so that kids of all backgrounds feel supported.
- C** Discussions about LGBTQIA+ issues in school should be rare.
- D** No. LGBTQIA+ is a dangerous ideology that has no place in school.

QUESTION 4

What do you think about border security?

- A** We should have open borders and allow entry to anyone who wants to come to America. No human is illegal.
- B** America is a nation of immigrants. We should make legal immigration and asylum seeking easier so illegals don't feel like they have to risk their lives to gain entry.
- C** America should allow entry to some legal immigrants who won't be a burden to the system.
- D** We should close our borders and deport all illegal immigrants.

QUESTION 5

What role should the U.S. Department of Education (DOE) play in American students' lives?

- A** The DOE should receive more funding in order to expand its important role in funding government schools and providing student loan forgiveness.
- B** The DOE should provide funding to government schools as well as private, charter, and parochial schools, as long as they follow DOE regulations.
- C** The DOE should be limited in scope and power, while it's still recognized as a necessary institution.
- D** The DOE should be dismantled or significantly shrunk.
