## KEY TERMINOLOGY

<b>Interment</b>	The burial or entombment of human remains or of cremated human remains.
<b>Right of Interment (ROI)</b>	A right of interment is a legal entitlement to inter human remains or cremated human remains in a particular grave or cremation memorial.
<b>Holder of Right of Interment</b>	The holder is the person or persons to whom the right of interment is granted. They are, in effect, the 'owner' of the grave or cremated remains memorial.
<b>Cemetery to allocate</b>	In some areas the right of interment is allocated next in row by the cemetery trust. In this case, individual selection of row or plot is not available.
<b>Tenure</b>	The length of time (in years) that a right of interment has been granted for. Rights of interment for the interment of human remains are perpetual. Rights of interment for the interment of cremated human remains may be either perpetual or limited to 25 years.
<b>Pre-need</b>	The pre-purchasing of a right of interment or a service in advance of actual need (death).
<b>At-need</b>	The purchasing of a right of interment or a service at the time of actual need (death).
<b>Position</b>	A position is a space within a grave. There may be more than one position within a grave, allowing for more than one loved one to be interred in the same grave.
<b>Memorial</b>	Monument, tombstone, grave marker or headstone identifying a grave or graves. Can also refer to a nameplate, name bar or inscription identifying a crypt or niche.

# CEMETERY PRODUCTS AND SERVICES

## Cremated remains memorials

### Rose memorial

A rose under which cremated remains can be interred.

### Boulder memorial

A boulder under which cremated remains can be interred.

### Scattering area

An area within the cemetery boundaries which is designated for the scattering of cremated remains.

### Plaque

An inscribed plate attached to a monument or placed at a right of interment, usually made of bronze.

### Columbarium

An arrangement of niches that may include an entire building, a room, a series of special indoor alcoves, a bank along a corridor or part of an outdoor garden setting.

### Niche

A space in a columbarium, mausoleum or outdoor niche wall used or intended to be used for the inurnment of cremated human remains.

### Memorial Tree

A tree under which cremated remains can be scattered or interred.

### Living Legacy Forest Tree

Cremated remains are transformed into life-giving nourishment for a Living Legacy Forest Tree. In effect, your loved one becomes part of a living tree, creating a lasting natural memorial.

# CEMETERY PRODUCTS AND SERVICES

## Above-ground (mausoleum) interment

### Mausoleum

A structure, above ground, or partially above and partially below ground for interment of human remains. It may contain a combination of crypts, niches or columbaria.

### Crypt

An above-ground interment space in a mausoleum.

## Burial

### Grave

A space of land in the cemetery used or intended to be used for the burial of human remains.

### Vault

A concrete-lined grave below the ground. A fully-lined vault allows for the construction of a monument on top of the grave.

### Monumental grave

A grave fully covered by a stone monument, usually crafted from granite or marble by a stonemason. The monument sits above ground on top of the grave.

### Lawn grave

A grave covered with earth and re-turfed with lawn following burial. Lawn graves will usually feature a concrete beam or garden bed at the head of grave for placement of a plaque or headstone.

### Natural burial

A simple, natural, sustainable and environmentally sensitive form of burial in a designated natural burial area. Natural burial interments are usually completed with the deceased person being shrouded (no coffin) and interred in an unmarked single depth grave.

## Grave features

### Extra depth

Graves can be prepared to varying depths to allow for the interment of multiple individuals. The standard depth for a grave is approximately 2.2m and allows for two interments.

### Monument

A memorial made principally of stone that extends above the surface of the earth in upright form and bears the names of the occupants of the grave.

### Headstone

A marker that is placed at the head of the grave that names the person/people interred in the allotment/grave.

### Renovation

Work undertaken to modify, repair or alter an existing monument.

### Ledger

A solid covering, generally of stone, lying either on top or within the monument edges. A ledger is removed and replaced after interment.

### Foundation

Foundations are engineered footings that provide a stable platform for a monument to be built. They may be common foundations (built by the trust) or individual foundations (built by a stonemason).

### Desktop

A desktop is a form of memorial base for the placement of a plaque. A recumbent desktop places the plaque on a slightly elevated angle, lower at the front and higher at the back.

### Chip top

A cement preparation spread over the top a grave and allowed to set, often with a pebbled finish. Commonly used from the 1940s to 1960s. The chip top is removed for interment and must be reset by a stonemason.
