Tables

Faster data entry with Tables

Cut down time on big, repetitive checks by using the tabular format your team already knows.

ASSET

Maintenance

Put maintenance on **autopilot**

Eliminate the guesswork and automate your maintenance plans. Receive automatic notifications when assets require maintenance, helping to prevent breakdowns and injuries.

Create **custom** maintenance plans

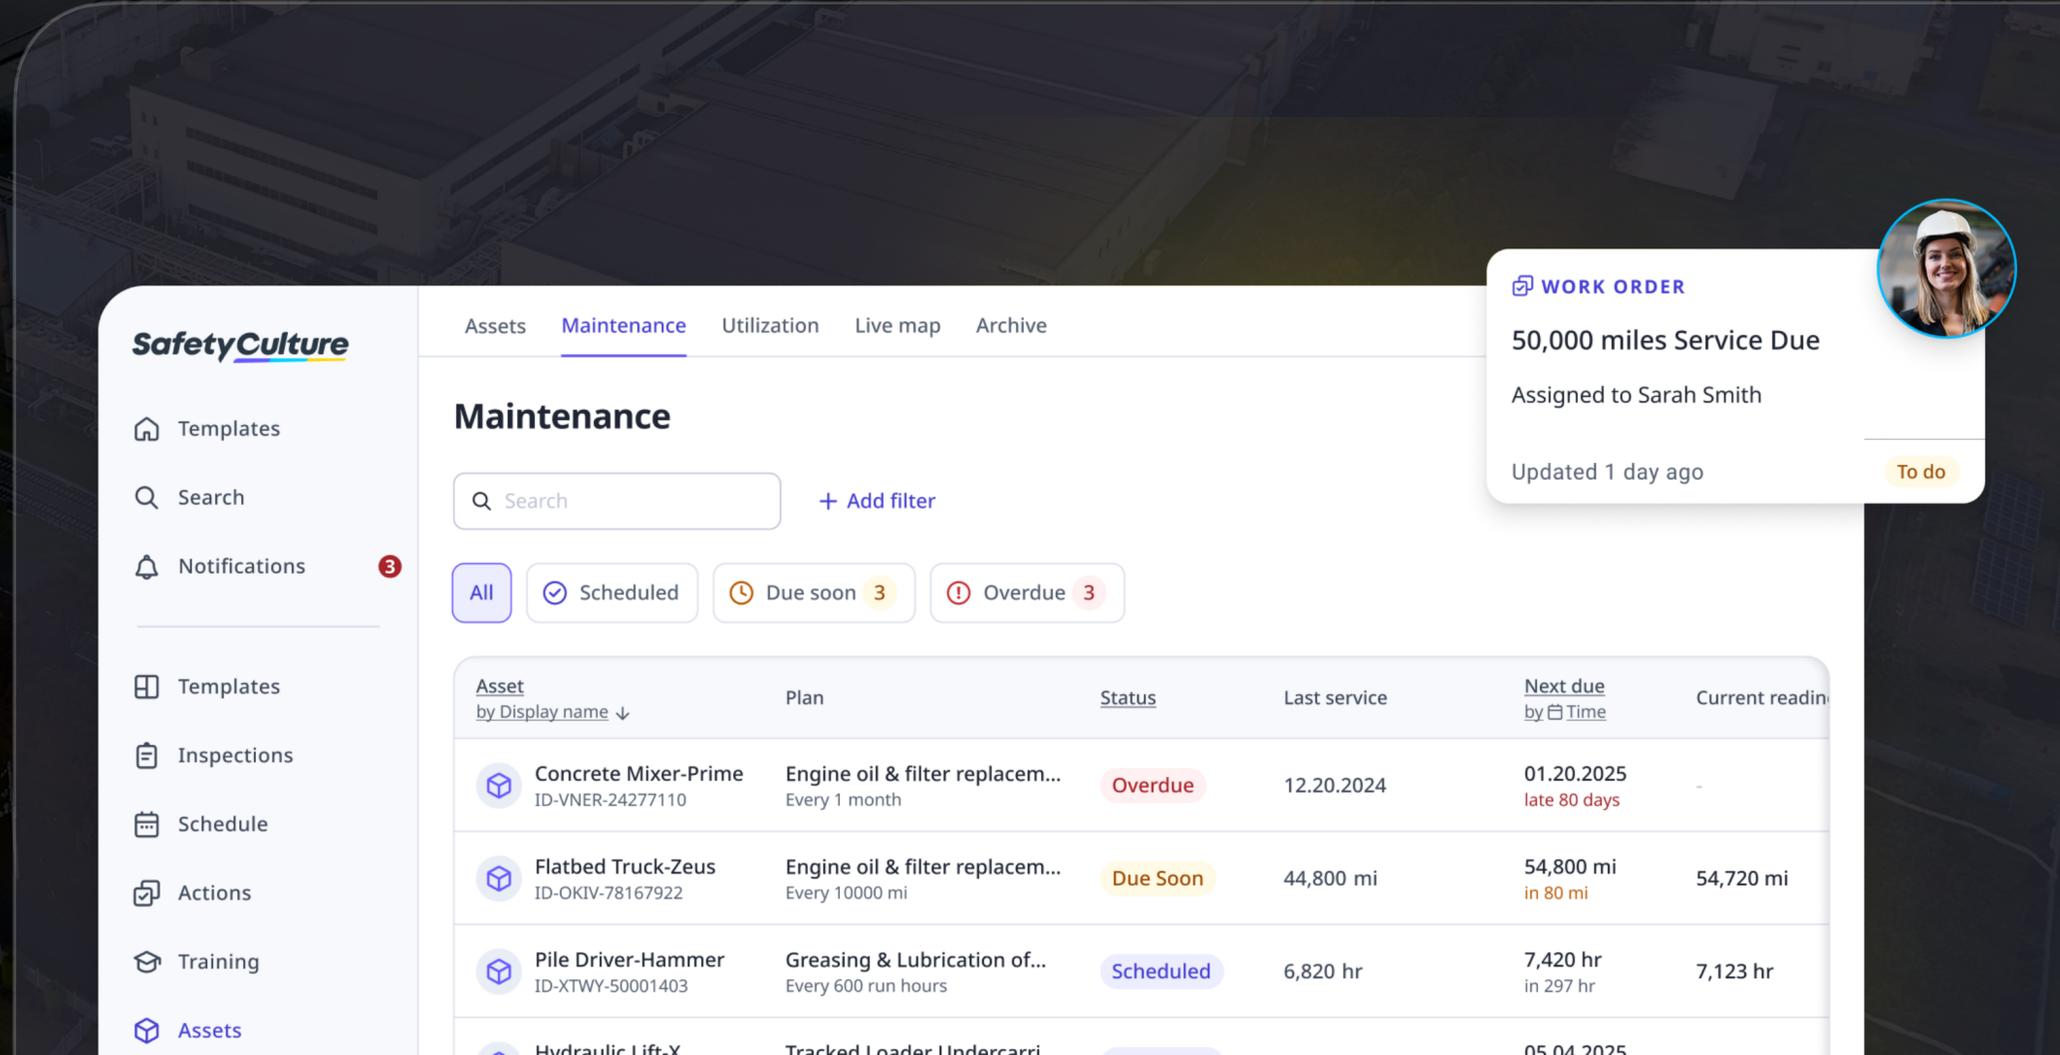

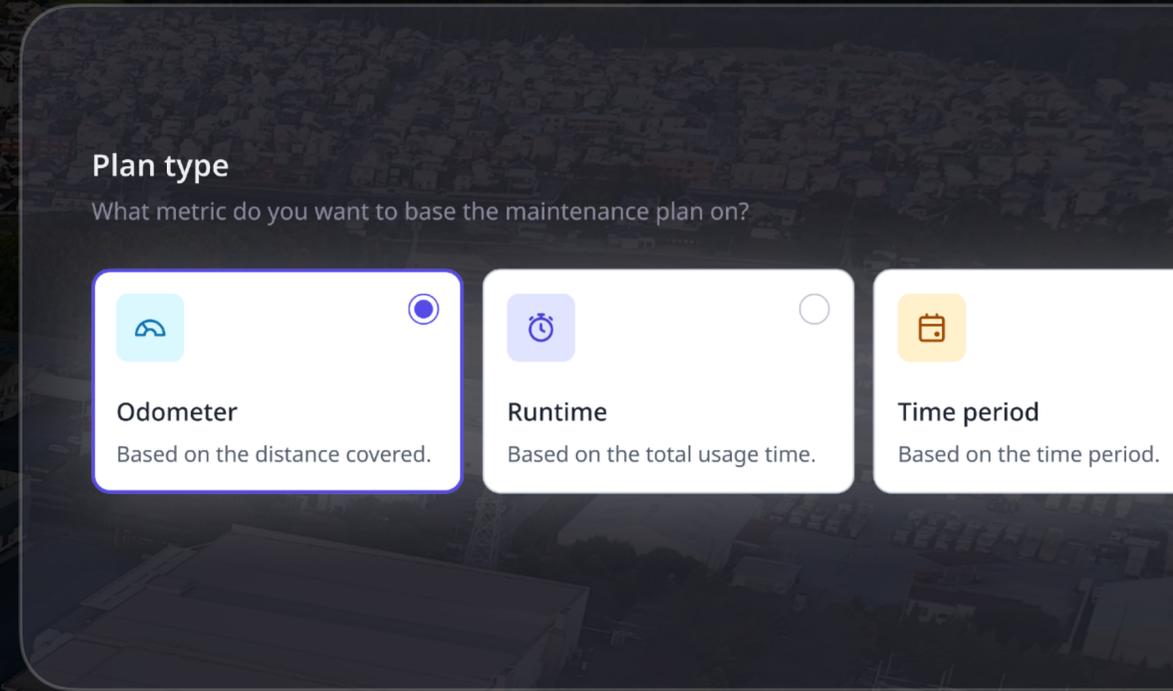

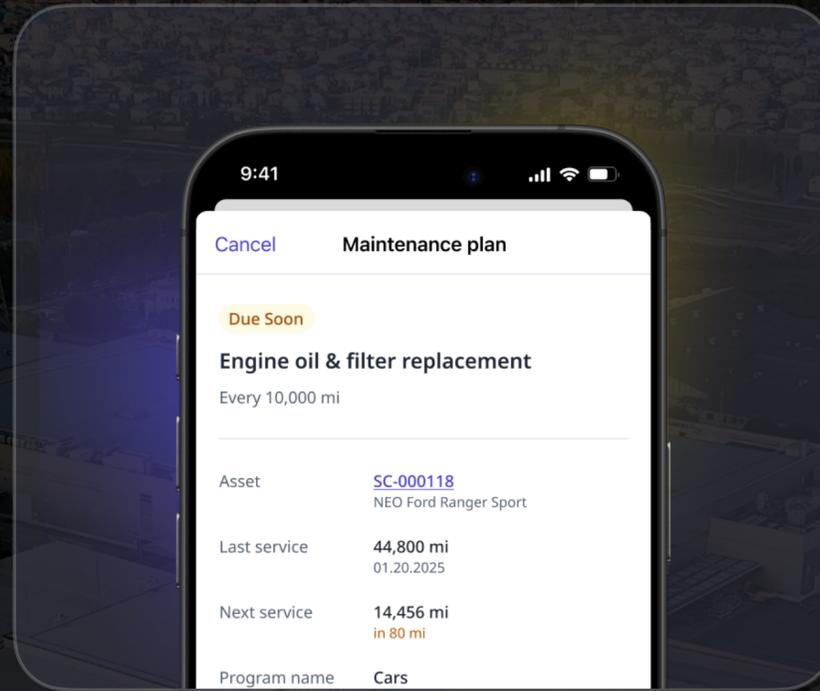

Create tailored maintenance plans for each type of asset. You can set up notifications triggered by odometer readings (mi/km), runtime (min/hr), or time-based intervals (Coming Soon).

Work order planning & scheduling

Create work orders to track maintenance tasks across your operations. Link templates to actions to simplify the process for your team, ensuring accuracy and consistency.

Log jobs & **assignments**

Assign work orders and track the job status until completion. Keep a record of who completed each task and maintain a complete history of all maintenance activities

Contractors

Prequalify your companies

Assign a company contact within your contractor's organization to manage key documents—like insurance and certifications—for their team. This cuts down on back-and-forth communication and lightens your administrative load.

Onboard their workers

WORKMEN'S COMPENSATION INSURANCE PRODUCT DISCLOSURE SHEET

IMPORTANT NOTE
Read this Product Disclosure Sheet before you decide to take out the Workmen's Compensation Insurance Policy. Be sure to also read the policy wording for full terms and conditions.

- What is this product about?**
The Policy indemnifies the insured in the event that any employee(s) in the insured's immediate service shall sustain an injury by accident or disease. The injury sustained by the employee(s) must arise out of or in the course of his employment with the insured.
- What are the cover / benefits provided?**
The policy indemnifies against all sums for which you shall be liable and responsible for all the costs and expenses incurred and for such injury under the Law(s) or at Common Law. Under this policy, the company will also be obligated to pay for the compensation of the injury.
- What is the premium I have to pay?**
The premium is noted on the quotation documents. It is calculated according to various factors, of which the main factors are:
 - Scope of Work
 - Estimated Wages
 - Nationality of Employees

4. What are the fees and charges I have to pay?

Type	Amount
Services Tax (ST)	6% of Gross Premium
Stamp Duty	RM 10
Commission paid to the insurance agent (when applicable)	15%

5. What are some of the key terms and conditions that I should be aware of? (This list is non-exhaustive; please refer to the policy wording for full terms and conditions.)

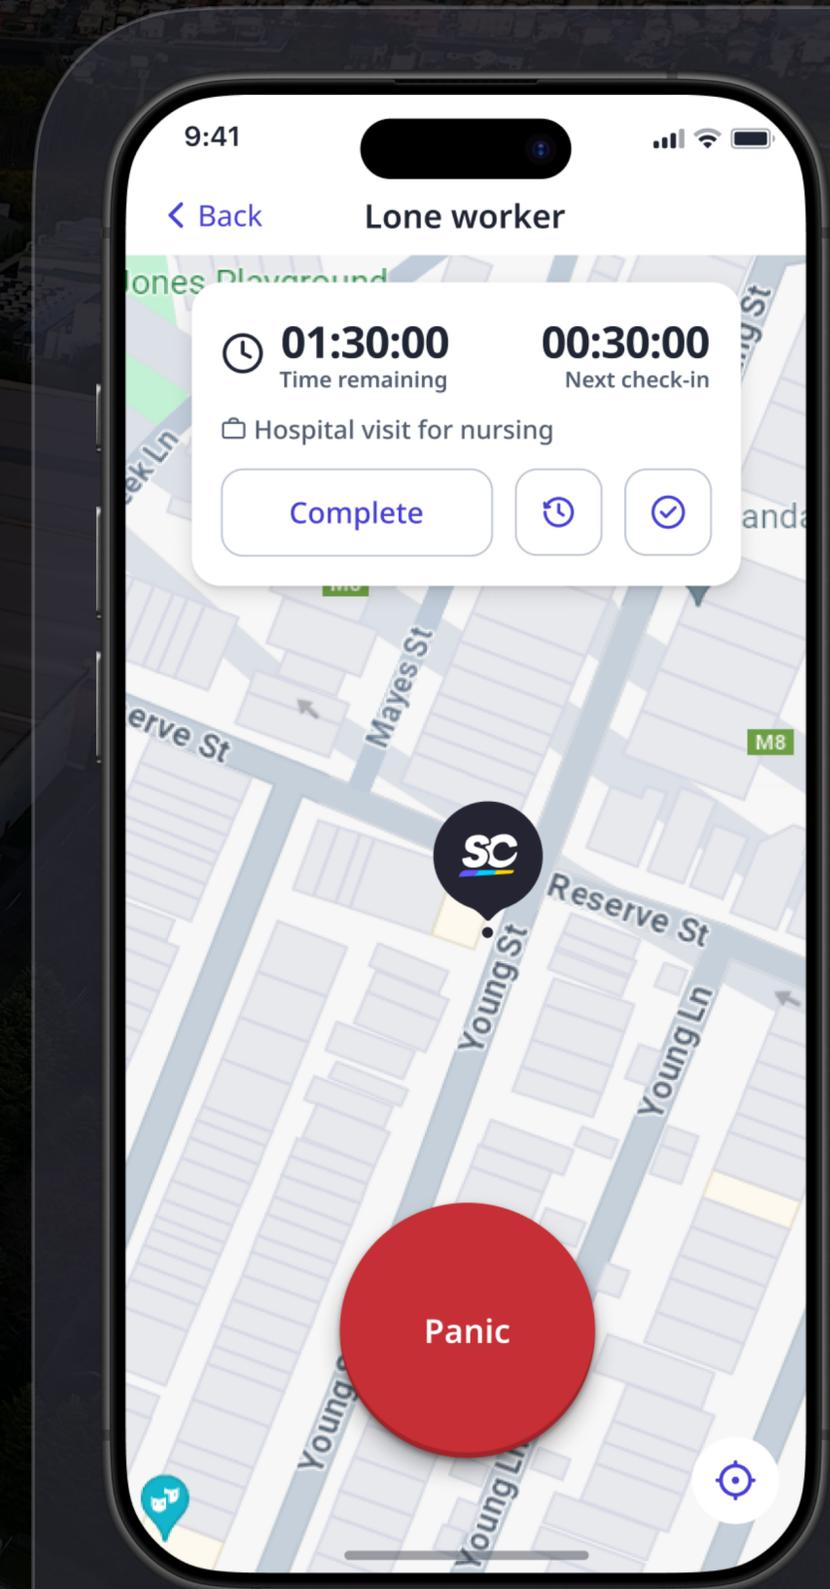

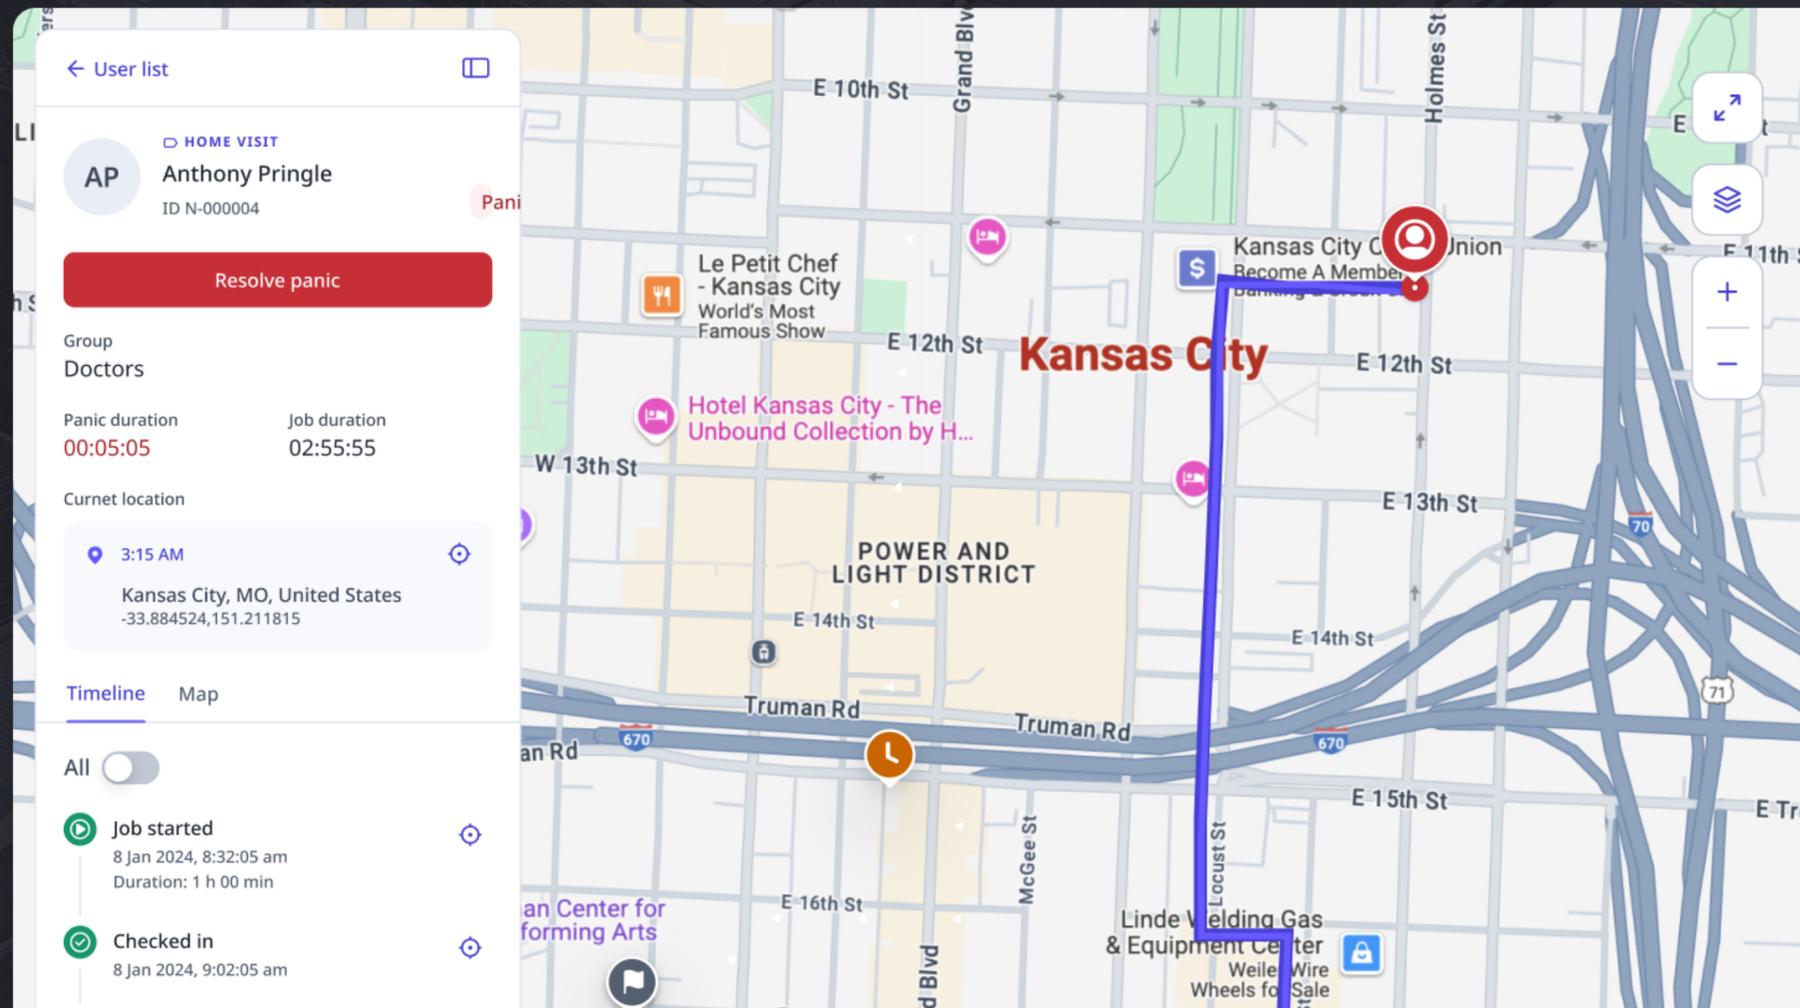

- Importance of Disclosure:** You should disclose to the best of your knowledge all material facts and confirm that all the declarations are true and correct; otherwise your policy may be invalidated.
- No Admission of Liability:** You should not admit to liability, offer, promise or pay to claimant without our written consent.
- Premium Warranty:** The premium due must be paid and received by the insurer within sixty (60) days from the inception date of the policy / endorsement/ renewal certificate.
- If you fail to pay the premium within the period, your policy will be automatically cancelled and AIG is entitled to the pro rata premium on the period you have been on risk.**

PEOPLE

Lone Worker

24/7 live monitoring

Integrate with duress response partners to give managers an added layer of support during incidents, ensuring help is always available when it's needed.

INVESTIGATIONS

Investigations

Investigations that fit your **workflow**

Use ready-to-go templates or customize investigations for different scenarios, like workplace incidents, safety breaches, equipment failures, or compliance violations. Set investigation statuses to match your workflow and keep teams aligned from start to resolution

Take action to **prevent** repeat incidents

Move beyond documentation—identify root causes, assign corrective actions, and track follow-ups. Link investigations to related inspections, issues, and actions to ensure that lessons learned lead to real improvements in safety, compliance, and operational efficiency.

Ask AI

Increase worker productivity

No more searching through docs, apps or paper. Workers can ask questions in plain language and get the critical information they need instantly.

Provide instant, accurate answers

Every worker gets accurate answers with links directly to your internal documents like SOPs, ensuring they have the most up to date information.

The image displays the 'Ask AI in Documents' feature in two views: a mobile phone screen and a desktop web interface. The mobile screen shows a search for 'safe handling of ammonia' resulting in a detailed document titled 'Safe Handling of Ammonia'. The desktop interface shows a list of documents including 'Standards', 'Assets', 'SOP', 'Risk Management', 'Emergency response plan', 'Installation Manual', 'Forklift User Manual', 'Circular Saw User Manual', 'Document Control Policy 2025', 'Corrective Action Procedure v3.2', 'SOP Supplier Approval v4.0', and 'Approved Supplier List March 2025'. A sidebar on the desktop screen contains a search bar, an 'Ask AI' button, and a list of document categories. Below the sidebar, there is a section titled 'How can I help you today?' with an 'Early Access' tag and a list of suggestions for getting started. At the bottom of the sidebar, there is a text input field for asking questions and a disclaimer: 'AI can make mistakes. Please review all content to verify accuracy and reliability.'

safe handling of ammonia

Safe Handling of Ammonia

Ammonia is a hazardous substance that requires careful handling to ensure safety. Here are some key points to consider for the safe handling of ammonia based on the retrieved documents:

1. Storage and Handling:

- Use equipment made of compatible materials of construction that are rated for cylinder pressure.
- Store full ammonia containers in a well-ventilated area like an open compound to ensure proper air circulation.
- Follow all regulations and local requirements for storing ammonia containers.
- Periodically check stored containers for leaks and general condition.

2. Protective Equipment:

- When handling ammonia cylinders, it is recommended to wear safety glasses. Additionally, a full faceshield should be worn.
