

Ingenuity in legal and data.

From routine litigation and IP matters to operational redesign, our modern solutions are built to scale, remove friction, and create competitive advantage.

Our Methodology

Singularly focused on driving value, we employ a consultative framework that brings together legal subject matter expertise, data science, and technology to solve operational challenges across multiple legal disciplines.

We work together to build an agile, data-centric ecosystem that learns, adapts, and expands.

Who We Are

We are a global team of licensed attorneys, data scientists, analytics experts, technologists, business process and service delivery professionals.

Our Services

Our solutions enable measurable performance improvement, risk mitigation, revenue gain, cost reduction, and digital business synergy:

Litigation & Investigations

Multi-platform by design, our comprehensive litigation support and investigations services are designed to take on the most complex discovery and review engagements. Leveraging AI and analytics expertise, we extract insights from data to bring speed to facts, enabling better decisions.

Intellectual Property

Bringing together technical expertise and operational excellence in IP administration, we help forward-thinking companies and law firms align IP assets with the business strategy. We help patent and trademark teams find hidden value in the IP function and assets, increasing profitability.

Contracts & Corporate Services

Our purpose-built suite of legal business solutions unlocks value, creates capacity, and accelerates business. We help organizations respond to major events, such as post-merger integration, as well as design programmatic solutions for contracts, compliance, and outside counsel management.

Legal Operations

Legal operations can be the most impactful area to better enable a legal and compliance department's operations to drive efficiency, cost-savings, and exceptional performance. Our data-driven and agile approach, domain expertise and technology platforms enable legal and compliance departments to become strategic operations leaders within the organization.

Client Success

Our outcome-based approach to service delivery has ensured the success of legal departments and law firms seeking to improve processes and workflows while driving innovation at scale.

Our collaboration with UnitedLex is helping us achieve a number of breakthroughs and rapidly emerge as a highly digital and data centric law department.”

Bjarne Tellman,
General Counsel, Haleon

Every day, we partner with legal professionals from diverse industries and practice areas. How can we help you?
