**Shop Notes : Customer description of problem, or request for work, BCI recommendations**

**SHOP RATE: \$200/hr, CUSTOMER SUPPLIED PARTS: \$250/hr**

Customer requests: The truck squeals then abruptly stops when I brake! BCI recommends: Bring her in and we will take a look to see what we can do to get her back on the road! We expect you to have her towed in this Friday 4/5/24. We ordered in your brake parts ahead of time from Advance so that we can get you processed quickly! UPDATE 4/4/24: I see that forums report this is a tricky year for brake parts, of course. Heads up--it might be a minor struggle in spite of all our preparations. UPDATE 5/22/24: We removed the right front wheel and bled the brakes to see if that was the cause of the truck pulling to the left and saw that everything looked new. We were able to get the rear to lock up and checked the rear brake components. A lot of the brake components will need replaced because there is a lot of build up and caked with fluid. The passenger side hardline was rust pitted so it was replaced. The wheel seal was leaking all over everything so we cleaned all the components that were affected. We are checking the radiator because it is leaking.

Qty./Part Numbers	Description of Materials or Work		Cost
	<b>Billing</b>	Parts	\$246.52
	Deposit is 100% of parts and 50% of labor.	Labor	\$2,100.00
