SNIPER EFI 2
Holley # 550-510-3XX
QUICKSTART MANUAL
SNIPER 2 EFI INSTALLATION INSTRUCTIONS

*Fuel pressure regulator - turn stem in to raise pressure
 (original regulator would only go to 60 PSI)*

Congratulations on your purchase of a new Sniper 2 EFI Throttle Body System built by craftsmen to exact standards in our Bowling Green, Kentucky facility. Every Sniper 2 EFI System is extensively tested for functionality before it leaves our facility for "bolt on and go" performance. Each throttle body is serialized ensuring a higher standard of quality control.

Should you experience any problems or need parts assistance that this QuickStart manual or the complete installation manual does not address, contact our technical service department at 1-866-464-6553 or log on to the website for a database of technical information and online support.

For complete technical resources regarding Sniper 2 EFI Ecosystem, please visit:

<https://www.holley.com/sniper2tech> *(page not found)*

BODY COLOR³ (Fiesta Red) DEALER CO
TRIM COLOR (Red & White) MONTH (Feb)
DAY OF THE MONTH

¹ Either 215 HP w/3-speed transmission/overdrive or 225 HP w/Fordomatic.
² All '55 & '56 models were coded 40A, whereas all '57 models were coded 40.
³ Body color and hard top. If a second letter shows, it indicates a different color for the hardtop.

⁴ 155th automobile (not only Thunderbirds) scheduled to be assembled on February 13, 1956.

⁵ SD signifies a Boston, Mass. dealer ordered this particular car.

Patent data plates are located on the firewall of the engine compartment near the heater duct. There were two basic styles used between 1955 and 1957 models. The large data plates were used on all 1955-56 Thunderbirds and 1957 models until mid-April. The small data plate was phased in during the week of April 15 to April 19, 1957. The smaller data plates were then used on 1957 models until the end of production of the 1957 Thunderbirds Dec. 13, 1957. The small data plates starting in April 1957 did not show the destination code or scheduled item number. On the smaller data plates the transmission type and rear axle ratio were shown following the date code.
