7/17/25

As a Ford technical trainer since 1986, I was aware of the new AC cobras being produced in England on the same assembly jigs and processes as the original cobras. AC produced approximately 480 more aluminum body cobras, about half of which were sold in the United States and can be viewed in the Shelby registry.

I was fortunate enough to find one of these vehicles right before the pandemic, and proceeded to backdate the look of some of the modern engine components, and make them look more in line with what was going on in the 60s at the same time, upping the performance to be equivalent to a Ford racing 302 at 360 hp.

A brief explanation of upgrades, starting with aluminum cylinder heads with larger valves and ports. A Ford spec 302F roller cam, roller rocker arms, double roller, timing chain set. A Ford racing aluminum intake and modified original carburetor.
With the increase in power required a increase in holding power for the clutch so a complete clutch assembly with flywheel was added.

Along with routine maintenance changing all fluids, packing wheelbearings turning rotors also installing new front coil over shocks plus a set of TA radial tires. The car was ready for the road and has been enjoyed over the last few years.

ALUMINUM 1986 Autokraft A/C Cobra- the Authentic Continuation of a Legend

- Make: Autokraft
- Model: A/C Cobra Mk IV
- Year: 1986
- Vin: SA9AK3029GA017139
- Engine: Ford 302 V8 (5.0L HO) with upgrades equivalent to a Ford racing 302
- Transmission: 5-speed manual transmission
- Mileage: 11,950
- Color: Mercedes Signal Red DB568
-

A True ALUMINUM Cobra, Born from the Original, built in England in the AC Factory, NOT a kit car

This is not a replica. It's a genuine Autokraft ALUMINUM A/C Cobra Mk IV, built under the license by Autokraft Ltd. In the UK with the full backing from A.C. Cars- the same company that partnered with Carrol Shelby in the 1960's to create the original Cobra legend. On same bucks and tools.

In the early 1980's, Autokraft acquired the rights and tooling from the original AC Cars LTD. and resumed Cobra production with the blessing of the Ford and A.C. Autokraft Cobras were hand-built in England using aluminum bodies, just like the originals, and were sold as "continuation" Cobras- true descendants of the 1960's Shelby Cobras. Some 900 hours required to construct each car.

RARE AND COLLECTIBLE:

Autokraft produced fewer than 480 Mk IV ALUMINUM Cobras between 1982 and 1996 (only 450 units between 1982-1987), making them significantly rarer than most Cobra replicas flooding the market today. The 1986 example featured here is one of only a few built that year, and it remains all its original specification.

Unlike kit cars or replica's Autokraft Cobras carry REAL AC CHASSIS NUMBERS and are often eligible for vintage racing and prestigious concours events. They are also listed in the SHELBY REGISTRY, as all Autokraft AC cars were, due to their historical lineage.

PERFORMANCE & CRAFTSMANSHIP

This Mk IV is powered by a high-output Ford 302 V8, professionally updated with performance components equivalent to a Ford racing 302 at 360HP. Upgrades included aluminum cylinder heads with larger valves and ports; a Ford 302F roller cam, roller rocker arms, double roller, timing chain set, and a Ford racing aluminum intake and modified original carburetor, all backdated to look more in line with what was going on in the 60's. All mated to a smooth 5-speed manual transmission. The aluminum body is hand-rolled over a tubular chassis, with four-wheel disc brakes and independent suspension all around. This combination of authentic styling and modern drivability makes it a joy to own and drive.

- Original Autokraft Badging
- Smith's gauges and classic interior appointments
- Listed in the World Registry of Cobras
- Registered and titled as a 1986 AC Cobra

INVESTMENT-GRADE COLLECTIBLE

Autokraft ALUMINUM Cobras have appreciated steadily over the last two decades, with Top-tier examples fetching $230K+ at auction for pristine, stock, low mileage examples. Their rarity, build quality, and direct connection to the AC and Shelby lineage make them a smart alternative to both replicas and original Shelby Cobras (which command $1M+).

The 1986 Autokraft ALUMINUM A/C Cobra MK IV is one of the rarest and most authentic Cobras ever built.

AUTOKRAFT
AC
Mark IV by autokraft

autokraft proudly presents their A.C. Mk IV an aluminium bodied, two seat open sports car which is an improved and updated development of the world-famous A.C. Cobra manufactured for Shelby American and Ford Motor Company during the 1960s by A.C. Cars, one of the oldest and most respected of English Motor Manufacturers. The reputation of A.C. Cars PLC is founded on the production of exclusive, high quality, hand crafted motor cars and Autokraft are proud that they have been licensed by A.C. Cars to use the A.C. name on the Mk IV's.

Although the A.C. Mk IV follows the same basic form as the last Cobra produced by A.C. Cars, many improvements have been incorporated into the chassis, braking, steering and suspension geometry. The result is a well balanced tractable and easy to drive motor car fully in keeping with the highest traditions of the thoroughbred English sports car.

The A.C. Mk IV is constructed entirely in Autokraft's workshops by its sixty-strong staff of highly skilled craftsmen and some nine hundred hours are required to construct each car.

The design of the original Cobra has been modified to give a larger cockpit area with fully adjustable steering column accommodating almost all driving positions. The interior is trimmed in best quality Connolly hide and Wilton carpets with a full range of instrumentation.

The A.C. Mk IV complies with D.O.T. and other regulations and is available through the North American Dealer Network.

Main Workshop showing initial and final assembly areas

One-piece footbox/bulkhead unit and internal wheel arch panelling moulded in G.R.P.

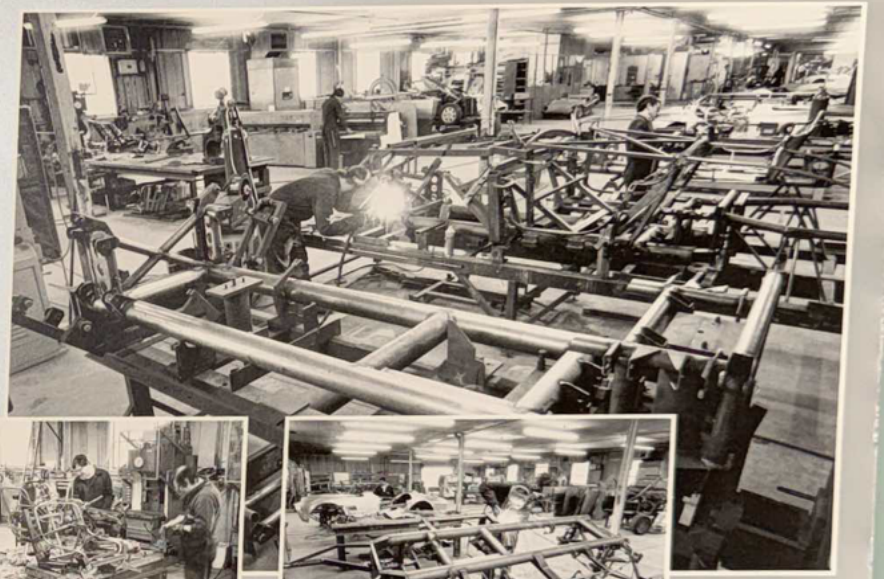

All components including front and rear wheel hubs manufactured in our own Machine Shop

The main chassis is constructed from 4" diameter solid drawn steel tubing using the original A.C. 427 Cobra jig. M.I.G. welded for maximum distortion. The future s... structure has ... designed to comply with current ... Side and Rear ... Safety ... regulations.

.....we even make our own seat frames

autokraft

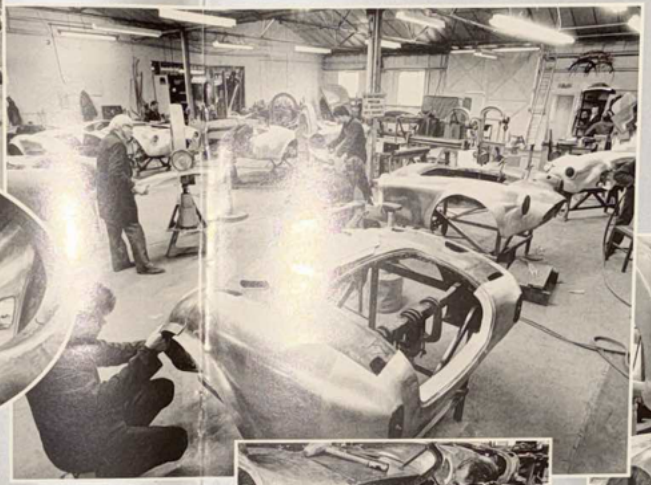

Hand built by Traditional English coachbuilding craftsmen

autokraft Mk IV

Each body requires some 200 skilled man hours to produce from 16 gauge aluminium sheet — this is true coachbuilding at its finest!

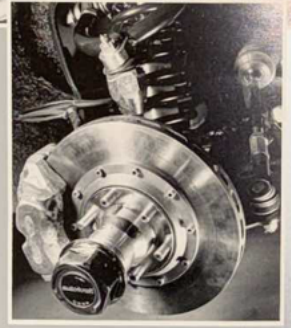

Front suspension fully adjustable for castor, camber, toe in, ride height and shock absorber damping.

Each body is painted to the highest standards to ensure colour depth and mirror finish, using 14 coats of paint, hand finished to completion.

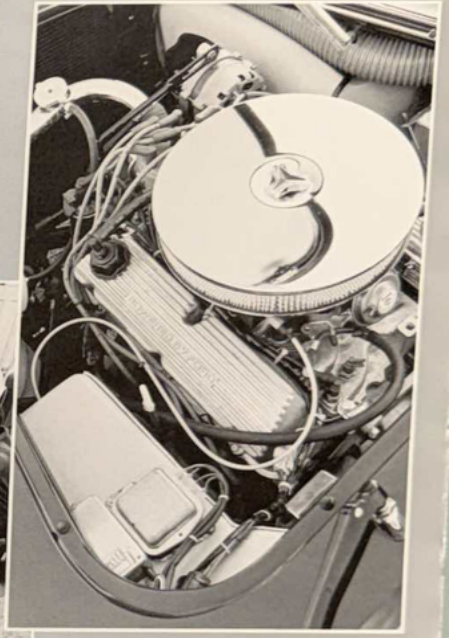

Mk IV

Selected English Connolly hides and wool carpets expensively trim the cockpit interior.

The A.C. Mk IV is fitted with the latest Ford 302 — 5 litre engine with 5-speed transmission.

autokraft

Supplied into Germany, Japan, U.S.A., Australia, South Africa and Switzerland.

AC Cobra Specification

Two seat, two door sports convertible of tubular steel "ladder" spaceframe construction. Main tubes of 4 in. diameter cold drawn tube. Stainless steel tubular bumpers on telescopic struts. Bodywork of hand-rolled 16 gauge aluminium alloy, seam welded using parent metal. Seats, facia and door panels trimmed in Connolly hide. Deep pile Wilton carpeting bound in leather. Convertible top and tonneau cover in Everflex. Electric radio antenna. Lockable fuel filler cap.

Instruments: Speedometer, tachometer, clock. Gauges for oil pressure, water temperature, fuel level and battery condition. Warning lights for brake fluid level, headlamp main beam, indicators/hazard lights, low fuel, handbrake, choke and seat belt fastening.

ENGINE
5.0 Litre Ford V8 302 EFI.
Dual stainless exhausts with tubular headers. Roller camshaft, aluminium valve covers and intake manifold.

TRANSMISSION
Borg Warner T5 5-speed. Salisbury limited slip differential.

SUSPENSION — Both front and rear
Independent by unequal length wishbones with coil springs and concentric shock absorbers.

STEERING
Rack and pinion. 3.3 turns lock to lock. 24 foot turning circle kerb to kerb.

WHEELS AND TYRES
Hallibrand pattern aluminium alloy with peg drive – 7 x 16 in. front and 8 x 16 in. rear. Steel braced radial ply (Goodyear Eagle GT) 225/60 VR 16 front and 255/60 VR 16 rear.

BRAKES
Four wheel disc brakes with 11.56 in. diameter ventilated front and 10.75 in. diameter rear. Dual independent servo-assisted hydraulic circuits. Mechanical parking brake.

ELECTRICAL EQUIPMENT
12 volt negative earth, fully fused. 72 amp. alternator, 65 amp./hr. battery. Two 60 watt sealed beam main headlamps with combined 45 watt dip headlamps. Parking and indicator lights at front. Parking, indicator and stop lights at rear. Hazard warning system. Windscreen washers with two-speed wipers and delay.

DIMENSIONS

Wheelbase: 90 in.	Length:	162 in.
Track (front/rear): 56 in./60 in.	Width:	68 in.
	Height:	49 in.
	Weight:	2620 lb.

The manufacturer retains the right to change specifications without notice.
