Autodesk was first introduced to datacamp through Sean Thistle, chief data officer of Data Science and Research Analytics, whom. Joining Autodesk, he had a passion for puzzle solving and was constantly looking to “all and seek”.

Adopting technology across engineering, architecture, construction, product design, manufacturing, media and entertainment, empowering innovators to new challenges big and small, their mission is to “reach and propel” toward products to maximize technology. Autodesk software helps customers to create and design a better world for all.

The solution
Autodesk’s data science and product management team could study dataCamp in their time to devise an offering. They included joining dataCamp, an experienced learning with rich context, and working with graduate students in Python. (James) later was found successful by learning content that leads with a White Willow, making relevant training existing Autodesk business challenges.

The gold standard of training for Autodesk’s data science team
The incorporation of dataCamp’s curriculum and the associated learning with hands-on code means that teams can be consolidated using specific insights and skills. (James) is the clear solution of commitment and support for data, and is ready to ensure it for me to identify your current skills, and to feel the same when they tell us about learning something you’ve been through other platforms.

Join 20,000+ companies and 60% of the Fortune 5000 who use DataCamp to upskill their teams.
